

# Martin Wangari

● AVAILABLE NOW

Software Developer · IT Systems Support · Nairobi, Kenya

---

## \$ whoami

Hardware-to-software developer: PCB repair, fiber splicing and smart-meter firmware on one side; full-stack products (POS, school, property and ride-hailing systems) and Office 365 / IT support on the other. I can debug the device and ship the software.

## \$ hire

Engagement : full-time · contract / freelance · remote or on-site (Nairobi)  
Roles : software development · IT support & systems · hybrid hardware + software  
Rates : shared on request      Reply: usually same day on WhatsApp

## \$ experience

|                                                                           |                     |
