PROFESSIONAL SUMMARY

Software developer and IT systems support specialist with 3+ years of experience across IT support, network infrastructure, hardware diagnostics and full-stack web development. Builds practical products — restaurant POS, property and school management systems, a ride-hailing platform — and brings hands-on hardware depth: PCB repair, smart-meter firmware and fiber splicing. Skilled in Office 365 administration, API testing with Postman, and AI tools and automation. Available now for full-time, contract or remote work.

EXPERIENCE

IT Systems Support Technician — Independent Contractor, Nairobi, Kenya

March 2025 – Present

- Provide first- and second-level support for hardware, software and network issues via phone, email and in person.
- Administer Office 365 environments: user account management, license allocation and deployment support.
- Test and validate internal API endpoints with Postman ahead of release to support integrations.
- Install, configure and maintain end-user devices and business applications.
- Manage IT asset inventory and coordinate policy-compliant equipment disposal.
- Identify and report IT risks, feeding into policy improvements; write training materials that reduce recurring support tickets.

Repair Technician / PCB Technician — M-Gas Kenya Ltd, Nairobi, Kenya

July 2022 – February 2025

- Performed PCB configuration, troubleshooting and repair on critical electronic components.
- Diagnosed and replaced faulty components, reducing downtime and extending equipment life.
- Installed and tested firmware on smart meters, preparing them for field deployment to specification.
- Carried out general maintenance and repair of electronic equipment.

Field Network Technician — G-Tech Technology Ltd, Nairobi, Kenya

January 2022 – June 2022

- Installed and configured residential fiber internet services.
- Spliced and repaired fiber optic cable, restoring service and minimising interruptions.
- Managed cable installation and router configuration for network stability.

Industrial Attachment — Broadband Communication Networks Ltd, Nairobi, Kenya

March 2021 – May 2021

- Assisted with cabling, router and telephone system installation.
- Gained hands-on experience in fiber internet installation and diagnostics.
- Supported server network hardware configuration under supervision.

SELECTED PROJECTS

- **Eduwincare** — live client site — marketing site for a Minnesota homecare and nursing service (eduwincare.com).
- **Sammy Trucks** — live client site — ISUZU truck dealer in Ruaka, Kenya, with a WhatsApp-first lead flow (sammytrucks.netlify.app).
- **Mpambe Hotel POS** — interactive demo — restaurant POS with dine-in, take-away and delivery, M-Pesa/cash/card checkout, receipts and inventory.
- **Maxland Properties PMS** — interactive demo — units, tenants, leases, invoicing, arrears and maintenance workflows.
- **Benuru Schools SMS · Joyrinah Schools MS** — interactive demos — school management covering admissions, CBC curriculum, attendance, exams, fees, HR and parent portals.
- **ByZenna Essence** — interactive demo — luxury fragrance storefront with filters, wishlist, cart and simulated checkout.
- **Ride-hailing platform** — in progress — React, Supabase and PostgreSQL; real-time booking, dispatch and driver tracking.

Demo builds use sample data. Live demos and code: martin-wangari.vercel.app · github.com/SolezMartins
